neural precursor cell
cell population proliferation
NES
neural precursor cell
GDNF
&
SHH
astrocyte
cell population proliferation
GFAP
acetylcholine
AF64a
penduncolo pontine tegmental nucleus (PPTg)
SHH
neuroglial cell proliferation
ITGAM
CD68
microglia
activated microglia M1
neuron death
TH
SHH
nucleus
synaptic transmission dopaminergic
ROS
neuron death
RET
SHH
neuron
TUBB3
neuronal precursor cell
neuron
GFRA1
RET
cholinergic interneuron
positive regulation of neuron death
neural precursor cell
NES
cell population proliferation
GDNF
neuron differentiation
TUBB3
SHH
&
neural precursor cell
neuronal precursor cell
GDNF
GDNF
SHH
nucleus
SHH
nucleus
neuron death
smoothened signaling pathway
SHH
cholinergic neuron
SHH
GABAergic neuron
neuron
cell population proliferation
astrocyte
S100B
prostaglandin E2
K-252a
NTRK2
prostaglandin E2
PTGES2
prostaglandin H2
ER
EPO
purmorphamine
SHH
PI3K cascade
activated microglia M1
NR4A2
Akt pathway
microglia cell mediated neurotoxicity
TGFB1
cytokine production involved in inflammatoryresponse
NFκB cascade
TNF
IL1B
EGCG
minocycline
EGCG and minocycline
PTGES2
BDNF
TNF
NOS2
IL1B
IL6
nucleus
nitric oxide
SHH
BDNF
CREB1
P
PRKAA1
T172
PRKAA1
T172
microglia
EGCG
minocycline
astrocyte-conditioned medium
astrocyte
SAG
PTCH1
SHH
regulation of action potential firing rate
kainic acid
neuron death
neuron
MAP2
SAG
purmorphamine
SHH
SLC1A2
GFAP
astrocyte activation
smoothened signaling pathway
SLC1A2
PTCH1
GLI1
SMO
nucleus
cell population proliferation
astrocyte
